This is an archive of the "Auto Mechanics" educational program published by Dorsett Educational Systems, Inc. in 1983. This was originally packaged as a set of 8 cassette tapes for use with Atari 400 and 800 computers and the Educational System Master Cartridge. The main files (ka1 through ka16) are likely the versions you want to use with your Atari or emulator. These have been split into 16 files (one per tape side). The audio levels have had their volume normalized, as well as any pops and clicks removed, and subsequently repaired on the data tracks. Each tape has been verified to work on the Altirra emulator. Finally, photos of the cassette tapes are included.

Album: Auto Mechanics
Year: 1983
Original Format: Atari Educational System (Dorsett Talk & Teach)
Digital Format: Microsoft WAV, 2 channel, 16-bit 44100Hz sample rate

The work of digitization and audio cleanup was done by Kevin Savetz and Thomas Cherryhomes in June 2015

Tracks (size in sum: 1.01 GB):

- Ka1-Checking out a used car; size: 58.4 MB
