

Atari Boxes#

One spin-off out of the Atari Accountant project is a new list for the Atari CX4xy boxes. Where x and y can each be a number from 0 to 9, please see below for the actual list. Interesting is the fact, we had CX404 for the 810 drive and the same(!) program obviously for the 815 drive, the 'beast', under the mark: CX408, while the Atari 800 with 48 KiB remains the same...

So, does anyone know about the labels not yet described, e. g. 407, 409 and so on? Would be of great help to complete this part of Atari history.

Thank you very much in advance. :-)

CX401 General Accounting System (4 SSDD Diskettes)

CX402 Accounts Receivable System (4 SSDD Diskettes)

CX403 Inventory Control System (5 SSDD Diskettes)

CX404 Atari Word Processor-for 810 drive
