- [Dorsett Atari Basic Algebra MA](#)

This is an archive of the "Mathematics (Basic Algebra)" educational program published by Dorsett Educational Systems, Inc. in 1983. This was originally packaged as a set of 8 cassette tapes for use with Atari 400 and 800 computers and the Educational System Master Cartridge.

The "raw recordings" directory contains the unaltered recordings from cassette, one file per tape, with both sides of each tape in the same file. You probably don't want to use this folder.

The main files (ma1 through ma16) are likely the versions you want to use with your Atari or emulator. These have been split into 16 files (one per tape side). The audio levels have had their volume normalized, as well as any pops and clicks removed, and subsequently repaired on the data tracks. Each tape has been verified to work on the Altirra emulator.

Finally, photos of the cassette tapes are included.

The work of digitization and audio cleanup was done by Kevin Savetz and Thomas Cherryhomes in June 2015.

Album: Mathematics (Basic Algebra)

Year: 1983

Original Format: Atari Educational System (Dorsett Talk & Teach)

Digital Format: Microsoft WAV, 2 channel, 16-bit 44100Hz sample rate

Digitized by: Kevin Savetz/Thomas Cherryhomes

Tracks:

ma1 The Logic of Algebra

ma2 Algebraic Equations

ma3 Solving Equations

ma4 Operations with Plus and Minus

ma5 Working with Sets

ma6 AL-JEBR

ma7 Algebraic Functions

ma8 Fractions and Division

ma9 Solving Problems with Equations

ma10 Ratio, Proportion, and Variation

ma11 Problems with Two Unknowns

ma12 Simultaneous Equations

ma13 Exponents

ma14 Quadratic Equations

ma15 More Quadratics

ma16 Equations and Trigonometry

Tracks (size in sum: 1.5 GB):
