

## create a BIN file out of a HEX file#

This is an example on how to do it with Mac OS X in the app Terminal:

For a single file please use:

```
xxd -r -p HEX.IN BIN.OUT
```

For multiple files in the folder 'IN' to store in the folder 'OUT' please use:

```
cd ./IN
```

```
for filename in *; do
```

```
xxd -r -p $filename ../OUT/$filename
```

```
done
```
