- [Reading-Development \(Reading Comprehension\) T](#)

This is an archive of the "Reading Development" educational program published by Dorsett Educational Systems, Inc. in 1983. This was originally packaged as a set of 8 cassette tapes for use with Atari 400 and 800 computers.

The "raw recordings" directory contains the unaltered recordings from cassette, one file per tape, with both sides of each tape in the same file. You probably don't want to use this folder.

The main files (t1 through t16) are likely the versions you want to use with your Atari or emulator.

These have been split into 16 files (one per tape side). The audio levels have had their volume normalized, as well as any pops and clicks removed, and subsequently repaired on the data tracks. Each tape has been verified to work on the Altirra emulator.

Finally, photos of the cassette tapes are included.

The work of digitization and audio cleanup was done by Kevin Savetz and Thomas Cherryhomes in May/June 2015.

Album: Reading-Development (Reading Comprehension) (T)

Year: 1983

Original Format: Atari Educational System (Dorsett Talk & Teach)

Digital Format: Microsoft WAV, 2 channel, 16-bit 44100Hz sample rate

Digitized by: Kevin Savetz/Thomas Cherryhomes

Tracks:

T1 Letters, sounds, vowels - Aa-Ee

T2 Letters, sounds, vowels - Ff-Jj

T3 Letters, sounds, vowels - Kk-Oo

T4 Letters, sounds, vowels - Pp-Tt

T5 Letters, sounds, vowels - Uu-Zz

T6 it, in, is, if, etc.

T7 pin, pit, fit, fin, etc.

T8 hit, sit, lit, his, tin, him, etc.
